Collection 2024 - 2025

Colour Book

Solid Surface Material

 LX Hausys

COLOURS

HIMACS solid surface is identical for every colour, although darker hues have a higher percentage of natural pigments, which need more careful care and attention. There may be some slight variation in colour between the illustrated and the sample due to printing techniques, colour may vary slightly from the sample.

Alpine White is also available in the special formulations S728 HIMACS-FR (Improved Fire Resistance) and S828 HIMACS UV+ (Improved UV resistance).

* Suitable for exterior use. Please check conditions about level of suitability and warranty per colour.

* Less suitable for surfaces which are subject to high traffic, due to their higher pigmented colour saturation, marks may be seen more easily.

☞ As Marmo is a randomly veined product, specific fabrication guidelines need to be followed. Ask our sales representative for more information.

☼ Lucent colours have a higher level of translucency, more evident when combined with light sources.

☽ Colours with this mark have a semi-translucent effect, evident when combined with light sources.

● Design Collection by Marcel Wanders.

♻️ Contains SCS Certified pre-consumer recycled content.

OUTSTANDING FEATURES ABOUND. A COMPELLING MATERIAL.

HIMACS is a delicate composition of acrylic, minerals and natural pigments that combine to create a smooth, non-porous, thermoformable and visually seamless surface. The material meets the highest standards for quality in all aspects: material performance, fabrication, functionality and hygiene. Thanks to these qualities and the outstanding flexibility in fabrication and design, HIMACS offers countless advantages over conventional materials.

SEAMLESS PERFECTION

HIMACS allows for visually seamless fabrication. Smooth integration creates large areas without visible joints or edges as well as the flush mounting of bowls. This results in extremely hygienic, easy-to-clean installations, ideally suited for use in hospitals and laboratories.

HUGE COLOUR SPECTRUM

Colour selection is a crucial factor when it comes to high-quality design. HIMACS offers an enormous range of colours. No matter what colour you choose, HIMACS remains 100% homogeneous.

Photographed by © Petr Krejčí

THREE-DIMENSIONAL DESIGN

HIMACS boasts a simple heating process and three dimensional thermoforming capabilities. This enables greater forming flexibility compared with other conventional materials so that spectacular ideas can quickly take on a concrete shape. HIMACS Ultra-Thermoforming formula allows the material to be better shaped; the minimal internal radius of 6mm (previously 50mm) opens a wholly new design dimension.

DRAMATIC TRANSLUCENCY

Certain colours and thicknesses of HIMACS exhibit a subtle translucency when exposed to light. The translucent properties of HIMACS make it the perfect choice for lamps and illuminated furnishings.

SIMPLE PROCESSING

Although HIMACS is almost as robust as stone, it can be worked in the same way as wood. Using conventional carpenters' tools, this solid surface material can be sawn, routed or drilled. Thanks to the new Thermalcure-technology the surface of HIMACS performs better than the standard in Solid Surface. You save precious time because it is easier to work with.

All fabrication pictures on this page : Photographed by Dominik Obertreis

HIMACS PRODUCT LINE UP

HIMACS is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of acrylic, minerals and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for aesthetics, fabrication, functionality and hygiene offering manifold advantages over conventional materials.

AURORA & MARMO

The Aurora & Marmo Collection provides colours to address the current trends for top-quality marble aesthetics, ranging from semi-translucent white, through shades of grey, to striking dark brown and anthracite tones.

Image: Studio Podrini

GRAVILLA

The Gravilla collection follows the aesthetic veined trend of Aurora & Marmo combined with a granite particles inspiration thanks to the shorter veins and a chip effect.

TERRAZZO

HIMACS Terrazzo can be used for residential, commercial and public projects of any size or style and it's especially appropriate in high traffic areas such as restaurants and bars.

Image: Studio Podrini

VOLCANICS

Full of depth and mysticism, akin to a precious natural stone but with all of the advantages of solid surface material.

INTENSE ULTRA

The new HIMACS Intense Ultra combines the best of two worlds: Intense Colour Technology and Ultra-Thermoforming.

Image: ©Studio Podrini

LUCIA

Natural trendy colours characterised by linear-edged, midsize particles: three of those designed by Dutch Star Designer, Marcel Wanders.

SOLIDS

From effortless to extravagant, classic to ultra-contemporary - this is a timeless collection.

CONCRETE

Warm-tones concrete-like finishes are now available in the solid surface material, providing completely new opportunities for architects and designers.

ASTER

With transparent grains and mother of pearl shimmer.

GRANITE, QUARTZ, SAND & PEARL

A huge selection of textures and colours. Natural, elegant and perfect in combination.

LUCENT

When combined with precisely positioned light sources, the translucent pastel shades become transformed into dramatic design "highlights".

Unless otherwise stated, all images in this page photographed by © Petr Krejčí

HIMACS TERRAZZO COLLECTION

The Terrazzo trend is everywhere and it's a look with longevity, as our love for this random pattern mix is here to stay. Taking the trend and developing it for application in any interior, HIMACS Terrazzo can be used for residential, commercial and public projects of any size or style and it's especially appropriate in high traffic areas such as restaurants and bars. The graphic design, renowned for its speckled, dotted, asymmetrical, imperfect random pattern contrast has evolved over the years to become the abstract illustrative print we know and love today. Terrazzo goes with just about anything and the new HIMACS Terrazzo colours demonstrate this beautifully with the neutral tones of Terrazzo Classico and the industrial feel of Terrazzo Grigio.

HIMACS INTENSE ULTRA COLLECTION

The new HIMACS Intense Ultra is a revolution for the Solid Surface market which opens new possibilities for surface design. The new product range combines the characteristics from two disparate worlds: Intense Colour Technology and Ultra-Thermoforming. Dark colours become more "intense", darker and also more resistant, with less visible scratches. The new formulation allows for colour consistency during and after fabrication, maintaining the dark colour when worked, producing less sanding dust and leaving fewer sanding marks on the surface and edges.

The new HIMACS Intense Ultra also has excellent thermoforming capabilities. This new formula allows the material to reach a very small internal radius, up to 6mm, with almost no whitening effect even when using dark colours. Sharp curves and dramatic designs in darker tones that were once out of reach for solid surface materials, are now made possible with HIMACS.

HIMACS GRAVILLA COLLECTION

The Gravilla collection follows the aesthetic veined trend of Aurora & Marmo combined with a granite particles inspiration thanks to the shorter veins and a chip effect. The new Gravilla colours have the benefit of being easier to fabricate with seamless joining, ideal for large surfaces such as shower or wall cladding in a bathroom, long, wide islands in the kitchen or monolithic reception desks with big aesthetic impact.

HIMACS AURORA & MARMO COLLECTION

The Aurora & Marmo Collection combines marble-like aesthetics inspired by nature with all the benefits of the latest generation solid surface HIMACS: The completely non-porous material, which can be thermoformed allowing curved shaping, also allows for seamless surfaces and is easy to repair and clean.

With the semi-translucency of the colours Aurora Frost, Pavia and Aurora Cotton you can play with light effects giving dramatic results to integrate this natural phenomenon to your interior design.

HIMACS ASTER COLLECTION

Step into the world of Aster, where elegance meets warmth in a captivating range of hues.

This exquisite collection features a spectrum of colours, from the ethereal softness of almost white to the comforting embrace of a warm beige. What sets Aster apart is its enchanting mother of pearl shimmer, adding a touch of iridescent magic to each shade.

HIMACS LUCIA COLLECTION

This exceptional collection focuses on lively and harmonious textures that infuse each hue with distinct character and expression. It's no wonder that three of these remarkable colours were created by the renowned Dutch designer, Marcel Wanders himself.

Embrace the purity and sophistication of this collection as it harmonizes the classic appeal of black, white, brown and grey with a contemporary twist. With textures that breathe life into each shade, this collection captures the essence of timeless elegance and sets the stage for you to express your unique style and creativity.
